VERSION 1.0

THE MARK

The radiant iris

One spark sits at the center. One petal, lit the same warm amber, reaches outward from it — the rest stand in disciplined navy, holding the shape together. A thin halo contains the whole system without boxing it in.

It is not a letterform and it does not illustrate a product feature. It is a signal: precision, intelligence, and a single point of origin radiating outward through everything Nomin builds.

Lockups

Nomin

Primary lockup — navy on light

Nomin

Reversed lockup — white on navy

Icon alone — app icons, favicons

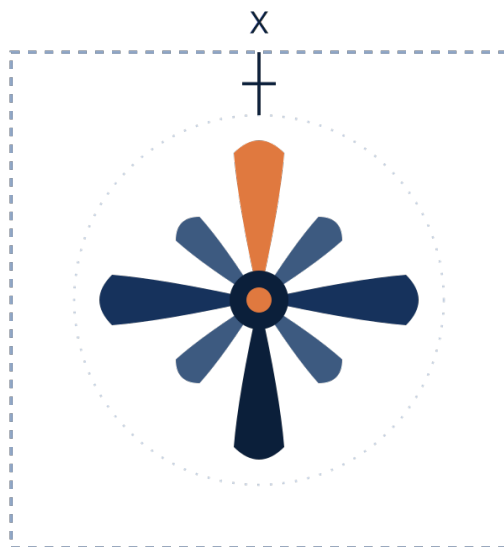

Single color — stamping, print

USAGE RULES

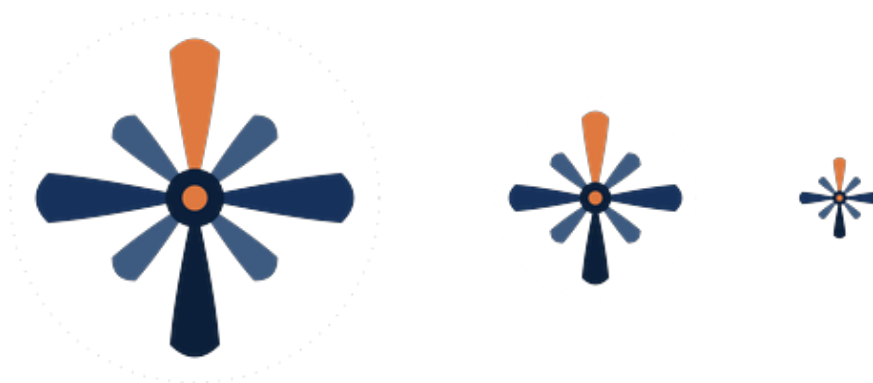

Clear space & minimum size

Keep a margin of at least X — the width of the core — free of text, edges, or other elements on every side of the mark.

Minimum size

Digital: never smaller than 24px. Print: never smaller than 10mm.

COLOR SYSTEM

Midnight, with one spark

Navy — primary

#0B1F3A

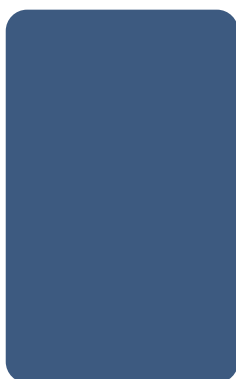

11, 31, 58

Navy — mid

#16325C

22, 50, 92

Navy — light

#3D5A80

61, 90, 128

Navy — pale

#8DA4C4

141, 164, 196

Amber — accent

#E0793F

224, 121, 63

Amber appears exactly once per composition — as the spark, never as a background or a repeated decoration. Its rarity is the point.

Set it clean, set it wide

Nomin

Wordmark — geometric sans, medium weight, slight positive tracking

Headings

Geometric sans, bold — Inter, General Sans, or Helvetica Neue Bold

Body text

Neutral sans, regular — Inter, General Sans, or Helvetica Neue

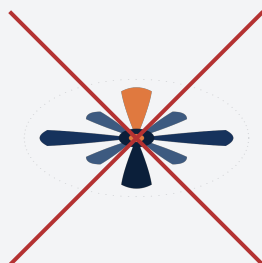

Code / technical

Monospace — JetBrains Mono or IBM Plex Mono

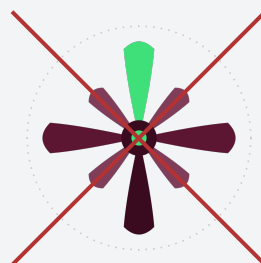

Do's and don'ts

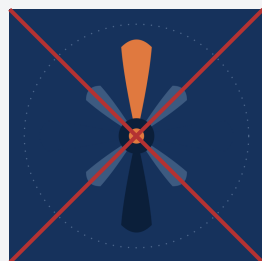

DO — keep proportions, color, and spacing exactly as specified

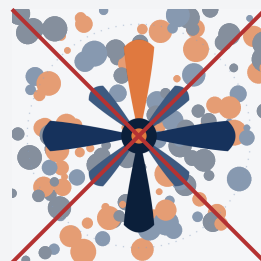

Don't stretch or distort the mark

Don't recolor outside the palette

Don't place it on low-contrast backgrounds

Don't set it against busy imagery
